Maps and documents made available by the Lee County Property Appraiser's Office are created as part of a Geographic Information System (GIS) that compiles records, information, and data from various departments, cities, county, state and federal sources. Users are encouraged to examine the documentation or metadata associated with each map for specific details regarding the source, date, scale, and accuracy. These maps do not meet or exceed National Map Accuracy Standards at a scale of 1" = 100' and have been compiled to meet 3.2 feet horizontal accuracy at a 95% confidence interval.
