

## Find My... Website Instructions

- Click on the “**Find**” icon  and type in your house number and street name (1500 Monroe), or just your street name (Monroe). *TIP: The less you type the more addresses you will have to pick from. When entering a street name, you can omit the street type (we use abbreviations: st, rd, dr, ter, blvd). You can enter just your street name (or partial street name) and all addresses on that street will be listed for you to choose from.* Some of the websites allow you to type in your 17 character STRAP number.
- Click on the desired address from the drop-down find list. The map will auto-zoom to the property. Click in the property boundary and a pop-up window with information will be displayed.
- *TIP:* You may click anywhere on the map to get information. The pop-up window may contain several screens of information. To scroll to the next topic, click on the white arrows along the top of the pop-up.

- Use the zoom icons on the top left of the screen to zoom in and out.  To move the map, left click-hold and drag the mouse.
- Click on the “**Switch Basemap**”  icon to view the background map of your choosing (streets, aerials, etc). Click on the icon again to exit the basemap view.
- Click on the “**Share**” icon  to send the web link via email, twitter or facebook.
- To create a map to print, click on the “**Print Map**” , choose a page orientation and fill in the title and author of your choosing. Click on Print Map icon . Shortly thereafter, the “View printed map” icon  will appear next to the Print Map icon . To view the map, click on the “View printed map” icon . To print the map, click the print button, to download the map, click the download button. 
- For Website help, click on the “**Help**” icon .
- *TIP:* To close any of the icon windows, click on the icons again.
